

ENGINEERING CHANGE ORDER

ORIGINATOR(S) of REQUEST

FLoRa Communications

DATE REQUESTED

18 November 2024

ECO FOR: schedule.md v1.0 → v1.1

RE: Petal v0.1, Petal v0.2, Datasheet, Enclosure v0.2

REASON FOR CHANGE:

Petal v0.1, v0.2, Enclosure v0.2 – Per our meetings, supervisors are happy with the current design, so we will not be doing any more hardware revisions.

Datasheet – The user manual assignment will include the things we would put in the datasheet, so we don't need to do one.

DESCRIPTION OF CHANGES:

1. Remove these from the official schedule (flora-docs/protected/schedule.md). Update schedule.md from v1.0 to v1.1 and add reference to this ECO in the changelog.
2. Remove these milestones and their issues from repositories so they are not longer visible on the Capstone Development Management roadmap.

Affects:

Requirements: ☐
Delivery Time: ☐
Cost: ☐
Functionality: ☐
Other: Schedule ☒

Description of Effects:

1. Protected document “schedule.md” will become v1.1.
2. Roadmap will no longer show the affected milestones.
